DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 74-89 are rejected under 35 U.S.C. 102(b) as being anticipated by Kramer.

Kramer teaches forming an annular reinforcing structure integral with a female end portion of a segment of polymeric material configured as a conduit. From Figure 1 and Figure 2, note element 13 and element 15, wherein element 13 shows the turned back portion encompassing element 15 which is an annular reinforcing structure. The material of the conduit is a rubber or an elastomeric material which reads on applicant's polymeric material. [See Column 4, paragraph 3]

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Usui, Gieseke et al. and Pauker et

al. each show conduits having reinforced end portions wherein the material of the conduit is turned out or even back on itself.
